Inter-Town Telephone.

NARROGIN AND WILLIAMS CONNECTED.

For some considerable time the advantage of a telephonic connection between Narrogin and Williams was impressed on the Postal authorities with the result that the representations made were favorably considered and the work put in hand. The telephone which is of the condenser system has now been installed and was opened to the public on Tuesday.

This facility will no doubt be greatly appreciated by business people and other residents of both Narrogin and Williams as a considerable volume of business is daily transacted between the two towns and the present mail service is only an alternate daily one.

The charge of a three-minutes conversation will be 4d but as there is no telephone exchange at the Williams a messenger charge of 3d will also be added to the cost of speaking from Narrogin to that centre.
